

Instructions for using the ZipWall® GripDisk™ non-slip pads

Place the GripDisk on the floor where you will want to spot the bottom of the pole. Place the pole on the disk. When you are ready to close off the bottom of the dust barrier, lift the pole and position the plastic sheeting under it. The plastic should be between the GripDisk and the bottom of the pole. .

Important: Both the GripDisk and the floor where the GripDisk is positioned must be clean and free of dust. After use, it's a good idea to store it in the original plastic bag. If it becomes too dirty to become effective, wash the GripDisk with dish soap and rinse with water.
